

# 1999 Orlando

## DIABETES AND THE EYE

4:00-5:30 PM

Auditorium, Level 3

### Combined Meeting with the American Association of Ophthalmic Pathologists

*Presiding Officer: J Brooks Crawford, MD*

*Chairperson: David J Wilson, MD*

Diabetic eye disease, more than any other disease, exemplifies the influence of histopathology on surgical and medical management of complex disease. This symposium will thoroughly examine the pathophysiology of diabetic eye disease and how this has evolved into our current medical and surgical management of this condition. Recent developments in pharmacologic intervention in diabetic eye disease will be reviewed.

### Zimmerman Lecture

4:00 PM

#### Introduction

*David J Wilson, MD*

4:02 PM

#### Zimmerman Lecture: Diabetic Retinopathy-Update

*Myron Yanoff, MD*

4:27 PM

#### Presentation of the Zimmerman Medal

*Edward L Howes Jr, MD*

4:30 PM

#### Diabetic Retinopathy: Prevention and Medical Management

*Robert N Frank, MD\**

4:40 PM

#### Diabetic Retinopathy: Laser Photocoagulation

*Robert H Rosa Jr, MD*

4:50 PM

#### Diabetic Retinopathy: Surgical Management

*Hilel Lewis, MD*

5:00 PM

#### Diabetic Retinopathy in Latin America

*Juan I Verdaguer Jr, MD*

5:10 PM

#### Research and Future Directions in Diabetic Retinopathy

*L Paul Aiello, MD, PhD\**

5:20 PM

#### Other Ocular Complications of Diabetes

*Marilyn Coburn Kincaid, MD*

5:30 PM

#### End of Session
